Technical Skills:

Strong: Javascript, Python, HTML5, CSS3, JQuery, Node.js, React, MySQL, Web Scraping

Experienced: C++, R, Git, PHP, Socket.io, AWS, Ubuntu, Chrome Dev Tools, Bootstrap

Applications Developed:

Super Smash Stats [live](#) | [github](#)

- Lead a team of five developers to create a database for competitive e-sports statistics
- Gathered stats from several websites using a **Web Scraper** written in **Python**
- Built the Backend using **Node.js** and **MySQL** and the Frontend using **React**

Film Funnel [live](#) | [github](#)

- Cooperated with three developers to create a Reddit/Youtube movie review aggregator
- Used **AJAX** calls to three different **API**'s to gather movie data and reviews

Memory Match [live](#) | [github](#)

- Solo developer on a dynamic memory match game versus an AI opponent
- Used **HTML**, **CSS**, **Javascript**, and **Bootstrap** for a responsive and interactive UI/UX
